-  **2 - 4** Bedrooms
-  **2.5 - 3.5** Bathrooms
-  **1,600+** Sq. Ft.
-  **2** Car Garage

Peak 332 is Cadence's smallest two-story — the plan that introduces the pocket office, tucked at the entry as standard. Main level: two-car garage, great room open to a kitchen-and-dining that reads as one generous room, powder, optional island. Upstairs, three bedrooms standard, or a two-bedroom-with-loft configuration that trades Bedroom 3 for a proper flex room. Primary suite with walk-in, dedicated bath, optional soaker tub / shower combo. Standard crawl space; an optional finished basement adds a fourth bedroom, third bath, and rec room. Vertical living starts with a well-run main floor — and a place to put the mail.

All square footage is approximate. Renderings are artist's conceptions and may vary slightly from the actual home. Homes may be built in reverse of plans shown, depending on site conditions. Minor architectural changes may be made occasionally at the option of the builder. Please contact your Sales Consultant for details.
