Parade is a home built around a single, quietly excellent detail: the door between the laundry room and the primary closet. Elect the option and the household's most tedious chore rearranges itself. Wash. Dry. Hang. Skip the hamper. Skip the hallway. It is the kind of small architectural intelligence that shows up in a plan drawn by someone who has actually done the laundry. The rest holds its own — a Great Room measuring nearly sixteen feet, an optional fireplace, a primary suite with a five-piece bath option, and a basement rec room with two possible wet bar locations. Parade earns its name by moving smoothly through the day.

All square footage is approximate. Renderings are artist's conceptions and may vary slightly from the actual home. Homes may be built in reverse of plans shown, depending on site conditions. Minor architectural changes may be made occasionally at the option of the builder. Please contact your Sales Consultant for details.
