There is a particular kind of two-story home that refuses to make its owners climb stairs to sleep. The Hannah is one of them. A main-floor primary suite tucked into its own quiet corner, with an optional barn door at the bath. Upstairs: three bedrooms, a loft, and a hall bath — or elect the option, and the upper level becomes a second primary suite entirely, five-piece bath and all. Two primary suites. One roof. Rare arithmetic. Downstairs, the main level unfolds around a walk-in pantry, a study, and an optional guest suite. Finish the basement and eight bedrooms are on the table.
