Moonflower is the largest home in the 4-Square Collection. The main floor opens with a standard den just inside the entry, then extends into a great room, a twenty-foot kitchen with walk-in pantry, and a dining space that flows to a covered patio. Upstairs, three bedrooms — the primary a full sixteen feet deep with a walk-in closet, and two more bedrooms alongside. Add the optional expansion and the plan bumps outward: a full fourth bedroom and third bath at the main level, entered from its own covered porch. Moonflower has room. And knows how to make more of it.

All square footage is approximate. Renderings are artist's conceptions and may vary slightly from the actual home. Homes may be built in reverse of plans shown, depending on site conditions. Minor architectural changes may be made occasionally at the option of the builder. Please contact your Sales Consultant for details.
