The 272 is the small home that eats like a real house. A dedicated nook off the kitchen, a proper island, a working pantry, a living room sized for the sectional already in the moving truck. Beyond a bedroom and full bath on the main level, the stair rises to a finished loft nearly two hundred seventy square feet wide — office, studio, sitting room, or storage. Two Modern elevations, standard and optional: butterfly-roof to steep-gable farmhouse. A good breakfast nook, and the room to gather around it.

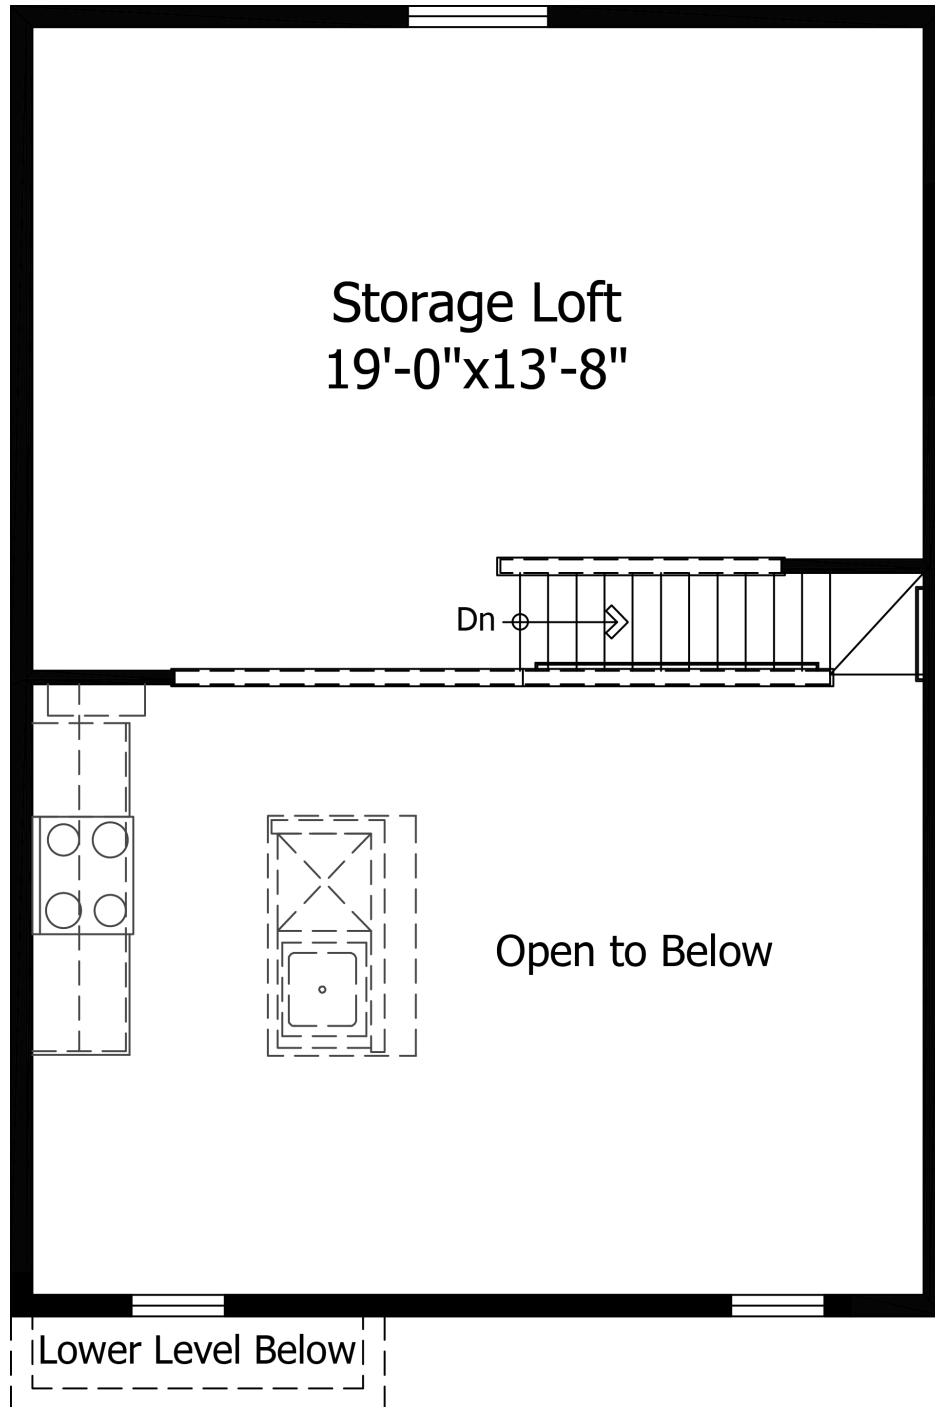

All square footage is approximate. Renderings are artist's conceptions and may vary slightly from the actual home. Homes may be built in reverse of plans shown, depending on site conditions. Minor architectural changes may be made occasionally at the option of the builder. Please contact your Sales Consultant for details.
